Summary

Front-End Developer & UI Designer with over 2 years of experience creating user-centered digital experiences. I focus on bridging the gap between aesthetics and functionality through modern web technologies and UX usability principles. My hybrid profile allows me to lead the implementation of design systems, ensuring intuitive, accessible interfaces with a cohesive visual identity.

Experience

Freelancer, Front-End Developer, Web & Graphic Designer

Jan 2024 – present
2 years 5 months

- Design and develop visually compelling digital experiences, including interactive wedding invitations and branded social media content, using Figma, Adobe Photoshop, and Adobe Illustrator to create cohesive visual identities across platforms.
- Build responsive and interactive web interfaces using HTML, CSS, and JavaScript, translating UI concepts into functional, user-friendly experiences with strong attention to layout, typography, and visual storytelling.
- Leverage AI-assisted development tools to streamline workflows, accelerate layout exploration, and develop reusable templates that improve efficiency, consistency, and scalability across projects.
- Create high-impact branded assets and digital content for industries including hospitality, travel, and personal care, producing social media graphics, short-form video, and promotional materials.

Its Time (Chrome Extension), Front-End Developer

Apr 2024 – Aug 2024
5 months

- Designed and developed a minimalist Chrome extension interface focused on real-time event countdowns, prioritizing visual clarity and non-intrusive user experience
- Built and implemented features using JavaScript, HTML, CSS, and JSON, optimizing performance to ensure a smooth and interruption-free browser experience.
- Improved user time management through dynamic visual alerts and intuitive UI interactions.

Read Mode, UI Designer

May 2024 – July 2024
3 months

- Redesigned logo and user interface in Figma and Illustrator, implementing customizable color filters.
- Directed usability research with 10 users to validate new color palette and navigation.
- Increased app visibility on Play Store, driving 4,000 downloads and improving ratings from 3.5 to 4.8 stars.

Remote, Video Editor

Jan 2020 – Dec 2023
4 years

- Produced and edited two weekly videos, using YouTube Studio to analyze metrics and optimize strategy.
- Managed publication schedules, contributing to a 300% increase in subscribers and doubling channel revenue.
- Created thumbnails using Canva.
